DATE MAILED: 01/04/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/923,045

Applicant(s)

RICHARDSON, DAVID E.

Examiner

Tadesse Hailu

Art Unit

2173

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 September 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 41-64 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 41-64 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This Office Action is in response to the AMENDMENT entered on September 28, 2004.
2. The present patent application is a continuation of application No 09/523,387, filed on March 10, 2000, now patented, 6,271,845, which is a continuation-in-part of application No. 09/087,338, filled on May 29, 1998, now patented, 6,054,987.
3. Applicant canceled claims 1 through 40, and introduced new claims 41 through 64. The new pending claims are examined herein as follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 41 through 64 are rejected under 35 U.S.C. 102(e) as being anticipated by Dev et al (US Pat No 6,374,293).

The present invention relates generally to network management, and more particularly to monitoring health problems of network devices and services of a managed network environment. Furthermore it is directed to not only to indicate the occurrence of a critical event, but to also be able to quickly and readily ascertain the exact nature of that critical event. Likewise, Dev, the prior art of record, is directed to do the same (Abstract). Consequently Dev anticipates the claimed subject matter of the present invention.

With regard to claims 41 and 58:

Dev discloses a network management method and system that includes a user interface, a virtual network and a device communication manager. The method and system allow a user to determine a health status of network objects in a managed network environment" (see Dev, abstract).

As per "displaying a plurality of group view containers each corresponding to a group of network objects sharing at least one user-definable group view attribute, and providing for each group view container an indicator representative of the overall health status of its corresponding group of network objects based on a health status of each of the group's network objects" (see Dev, Figs. 7A-7C, 8A-8B, Abstract, column 12, lines 39-column 13, lines 31).

As per "for each network object in a group of network objects corresponding to a user-selected group view container, displaying a representation of the network object, and providing an indicator representative of a health status of the network object as

Art Unit: 2173

determined by at least one user-definable health characteristic of the network object” (see Dev, Figs. 7A-7C, 8A-8B, column 12, lines 39-column 13, lines 31).

As per “for each of the at least one health characteristic of a user-selected network object, displaying a representation of the health characteristic, and providing an indicator representative of a health status of the health characteristic.” (see Dev, Figs. 7A-7C, 8A-8B, column 12, lines 39-column 13, lines 31).

With regard to claims 42 and 59:

As per “for each user-selected health characteristic, displaying any event or trap message indicative of an event affecting the health status of the user-selected health characteristic.” (column 7, lines 40-60).

With regard to claims 43 and 60:

As per “providing a health status indicator of each health characteristic comprises: causing the health status indicator of the health characteristic to indicate a poor health condition of the health characteristic when performance data of the health characteristic violates a predetermined threshold of the health characteristic.” (column 7, lines 27-35, column 13, lines 51-67).

With regard to claims 44 and 61:

As per “storing the at least one health characteristic for each network object in a health characteristic configuration file of the corresponding group view to which the network object belongs.” (column 3, lines 43-51).

With regard to claim 45:

As per “the health characteristic configuration file corresponding to each group of network objects is a registration file.” (column 3, lines 43-51, column 8, lines 5-14).

With regard to claim 46:

As per “the user can dynamically change network objects of a group of network objects by changing one or more of the at least one user-definable group view attribute of that group of network objects.” (column 3, lines 66-column 4, lines 20, column 6, lines 48-66).

With regard to claim 47:

As per “the at least one health characteristic of a network object comprises one or more of a group consisting of disk utilization, memory utilization, network utilization, and processor utilization.” (column 14, lines 39-56, Fig. 10).

With regard to claims 48 and 62:

As per “the at least one of the network object is either a network device or a network service of the managed network environment.” (column 11, lines 48-59).

With regard to claims 49 and 63:

As per “storing the at least one group view attribute for each group of network objects in an attribute configuration file of the corresponding group to which the network object belongs.” (column 2, lines 65-67, column 47-51, column 5, lines 44-57).

With regard to claim 50:

As per “the attribute configuration file corresponding to each group of network objects is a registration file” (column 5, lines 44-column 6, lines 14).

With regard to claim 51:

As per “the indicator representative of the overall health status of a corresponding group of network objects comprises either a color or a shape of an icon representing the corresponding group view container. ” (column 12, lines 39-46).

With regard to claim 52:

As per “the indicator representative of the overall health status of a corresponding group of network objects comprises an audible alarm” (column 8, lines 5-14).

With regard to claim 53:

As per “the indicator representative of the health status of a network object comprises either a color or a shape of a displayed icon of the network object” (column 14, lines 13-24).

With regard to claim 54:

As per “the indicator representative of the health status of a network object comprises an audible alarm.” (column 8, lines 5-14).

With regard to claim 55:

As per “the event or trap message indicative of an event affecting the health status of a user-selected health characteristic is stored as a field of the network object for which the health characteristic is defined” (column 7, lines 40-60).

With regard to claim 56:

As per “the field comprises a field of the network object in an alarm browser used in an Internet application” (column 12, lines 63-67).

With regard to claims 57 and 64:

As per "determining context sensitive information of a user-selected group view" (column 3, lines 66-column 4, lines 20); and as per "modifying one or more user interface mechanisms to conform with the determined context sensitive information" (column 6, lines 39-56).

CONCLUSION

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

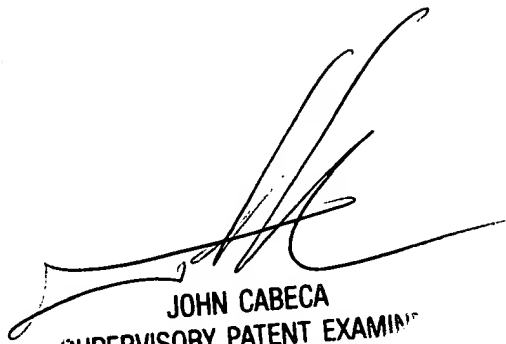

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Tadesse Hailu, whose telephone number is (571) 273-4051. The Examiner can normally be reached on M-F from 10:00 - 630 ET. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, John Cabeca, can be reached at (571) 273-4048 Art Unit 2173.

Art Unit: 2173

7. An inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.
